#PROJECTS

Recipe Finder App ([Demo](#))

Pulled data from the 'TheMealDB' api

Retrieved data from the database based on keywords from the user's input (e.g. if a user types the word 'chicken' the app would fetch all the recipes containing that word)

Displayed the results on the screen for the user to see

Expense Tracker App ([Demo](#))

Created the UI for the project

Keep track of income and expenses

Show balance, expense and income totals

Add and remove items and save to local storage

Built a website for a nonprofit using WordPress

Modernize a website for a nonprofit by improving its usability and design

Acted in a leading role on team of three to help consult the client at various stages of development for feedback

Iterated through versions of the product to ensure the requirements were met

Database Design Project

Designed, built, documented, and presented a functional database for a university

Worked effectively in a team of 5 with well-established roles and responsibilities

Stored and analyzed information about university students, staff, classes, and schedules

#Professional Experience

Stop and Shop Supermarket / Courtesy Clerk

June 2012 – Present

Provided assistance to shoppers by helping them load groceries into their cars

Developed exceptional personal skills to get along with others and work as a team

Attleboro Enterprises, Inc. /

Intern: Non-profit human service organization for adults with diverse developmental challenges

September 2018 – December 2018

Effectively executed a predefined process to digitize hundreds of confidential client paperwork

Devised a system for data collection and entry to maintain up to date client contact information

Digitally transformed the company by making the client data more available to its IT systems (e.g. search, reporting)

#Education

Framingham State University / Bachelors of Science in Business and Information Technology
